

CLOOS expands in North America

Ceremonial opening of the new location

HAIGER/SCHAUMBURG, July 2024 - In mid-June, CLOOS North America opened its new headquarters in Schaumburg (Illinois, USA). The state-of-the-art facility, which spans three acres, represents an investment of more than 15 million dollars.

With the investment, CLOOS aims to expand its presence in North America in response to the increasing demand for prefabricated and customised welding robot solutions.

Key features of the new facility include:

- Expanded production area with high-tech equipment
- Comprehensive warehouse to minimise delivery times for components
- New Experience Centre for product presentation and practical training
- Large office space to support the growing team

The expanded manufacturing capacity will significantly reduce delivery times for automated robotic welding solutions for customers in North America.

The new Experience Centre and training facility is more than five times the size of the company's previous demonstration area. The Experience Centre will serve as a hub to showcase CLOOS' product and process capabilities, R&D and complete welding automation cells, as well as provide practical customer training.

CLOOS Welding technology:

Robot and welding technology from a single source

Since 1919, Carl Cloos Schweißtechnik GmbH has been one of the leading companies in welding technology. About 1,000 employees all over the world realise production solutions in welding and robot technology for industries such as construction machinery, railway vehicles, energy, automotive and agricultural industry. The modern CLOOS welding power sources of the QINEO series are available for a multitude of welding processes. With the QIROX robots, positioners and special purpose machines CLOOS develops and manufactures automated welding systems meeting the specific requirements of the customers. The special strength of CLOOS is the widely spread competence. Because – from the welding technology, robot mechanics and controller to positioners, software and sensors – CLOOS supplies everything from a single source.
